145-VFG

This inlet is suitable for almost all applications. With a middle hinged inner valve the air will be divided and also flows underneath the valve when it is opened over 35%. The inlet is controlled by means of a stainless steel side arm. This inlet is executed with a curved inner valve so when it is opened for maximum ventilation air is also guide downwards to the animals.

(also available in self-closing version. See the ventilation concepts page for more information)
